WARNINGS

Read the instructions and warnings in the manual before operating this firearm.

This instruction manual contains operating, care, and maintenance instructions. Failure to follow the instructions and warnings in this manual can void the warranty. Failure to follow the instructions and warnings can also lead to accidents resulting in injury or death.

This instruction manual should be kept with this firearm at all times. This instruction manual should be transferred with it upon change of ownership.

There is no such thing as a foolproof firearm!

**FIREARM SAFETY
IS YOUR
RESPONSIBILITY!**

SCORPION

BASIC RULES OF FIREARM SAFETY

1. Before using any firearm, learn the mechanical and handling characteristics of your firearm.
2. Never point the muzzle in an unsafe direction.
3. Be sure to unload the firearm when not in use.
4. Check the barrel before shooting. Take care to make sure there are no obstructions.
5. Check your target thoroughly before shooting. Take note of anything or anyone close by.
6. Wear protective shooting glasses and hearing protection when shooting.
7. Never climb a tree, fence, or other structure with a loaded firearm.
8. Never shoot at any hard surface or at water.
9. Never transport a loaded firearm.
10. Never use any firearm when under the influence of alcohol or drugs.

GENERAL INFORMATION

Before disassembling or working with your Volquartsen Scorpion Pistol, be sure it is unloaded.

Alterations

Your Volquartsen Scorpion Pistol was designed to operate and function properly as it left the factory. Any alterations can cause the firearm to become unsafe. **DO NOT** substitute any part or accessory that is not produced by Volquartsen Firearms. If a repair becomes necessary for any reason, please contact us so we can repair your firearm properly. Any alterations of this pistol by anyone other than Volquartsen Firearms will void the warranty and any subsequent work needed will be charged at our full shop rate.

Trigger Mechanism

Your Volquartsen Scorpion Pistol features a target trigger that has been preset for trigger pull weight and optimal performance. It features internal parts made to exacting tolerances. Any modifications to this unit or its parts can cause the firearm to malfunction and/or become unsafe. Any alterations to the trigger mechanism by anyone other than Volquartsen Firearms will void the warranty and any subsequent work needed will be charged at our full shop rate.

SCORPION

Manual Safety

The safety locks the sear when it is in the “S” position. You can only engage the safety after your Volquartsen Scorpion Pistol is cocked. The safety should always be in the safe “S” position unless the firearm is being fired. Never rely on a safety mechanism to justify careless handling or allowing the gun to be pointed in an unsafe direction. The only way to ensure safety is when the bolt is open, the chamber is empty, and there is no magazine in the firearm.

Handling

The firearm may fire if it is mishandled, dropped, or struck with the safety in the “fire” position. Always make sure the chamber is empty and the magazine is removed when the firearm is not being used.

LOADING

First, insert the loaded magazine into the pistol. Load a cartridge into the chamber by pulling the bolt back. Activate the bolt release and release the bolt to let it go forward. The pistol is now fully loaded and the safety should be set to the “S” position until you are ready to fire the weapon.

UNLOADING

This firearm can be fired as a single shot pistol. Simply removing the magazine **DOES NOT** unload the pistol.

Fig 1

Your Volquartsen Scorpion Pistol can also be fired as a single shot pistol. The pistol should **NOT** be considered unloaded if the magazine is not in the pistol. To properly unload your firearm, first make sure the safety is in the safe “S” position, remove the magazine, pull the bolt to the rear, and eject the chambered cartridge.

Fig 2

Your final step is to visually inspect the chamber.

Fig 3

DISASSEMBLY

- 1 Ensure that the firearm is clear; no magazine inserted and the chamber is clear. (Fig 1 & 2)

Fig 4

SCORPION

2 Disengage the safety and dry fire the trigger releasing the hammer. (Fig. 3 & 4)

3 Using the mainspring latch removal tool, pull back on the mainspring lever to release the mainspring. (Fig. 5 & 6)

4 Pivot the mainspring up and pull down on mainspring to remove from pistol. (Fig. 7)

5 Tilt the barrel of the gun upwards and pull the bolt out. (Fig. 8)

6 Press the upper forward off the frame (may need to use a soft hammer to tap the upper off the frame). (Fig. 9 & 10)

Scan this QR code for a video that goes over disassembly, reassembly, and troubleshooting.

REASSEMBLY

- 1 Slide the upper onto the frame.
(Fig. 11)
- 2 With the barrel pointing up, slide the bolt into the upper. (Fig. 12)
- 3 Reinstall the mainspring by pushing it upward through the frame, upper, and bolt. (Fig. 13)
- 4 With the barrel pointed upwards and the safety off, depress and hold the trigger. (Fig. 14)
- 5 Pivot the mainspring down, making sure the hammer strut goes into the main spring. (Fig. 15)
- 6 Latch the mainspring and then release the trigger. (Fig. 16)

FIRING

Once the safety is switched to the fire position, your Volquartsen

Fig 10

Fig 11

Fig 12

SCORPION

Scorpion Pistol will fire with each pull of the trigger. Firing will automatically reload the pistol. Switch the safety back to the safe “S” position if you do not intend to immediately continue firing. Be sure to keep your face and hands away from the ejection port.

The bolt will remain open after the magazine is empty.

CLEARING A MALFUNCTION

Any auto-loading firearm may malfunction or jam. One of the easiest ways to prevent this is to keep the chamber clean. If a cartridge jams, **DO NOT FORCE IT**. A hard impact on the rim can ignite the ammunition. If a jam or malfunction should occur, follow these steps in order to clear the malfunction:

- 1 Point the muzzle in a safe direction.
- 2 If possible, remove the magazine before proceeding to the next step.
- 3 Pull the bolt handle rearward and lock the bolt open with the bolt hold open latch before attempting to clear the jam or malfunction. The jammed cartridge may clear itself when you retract the bolt, so keep your face away from the ejection port during this operation.
- 4 If the cartridge did not eject on its own when you retracted the bolt, be sure to use only wood “tools” to remove the jam. This will help prevent a live cartridge from being ignited. A wooden dowel with a pointed end is recommended. The use of metal tools or objects may damage the chamber as you attempt to clear the jam.
- 5 Before resuming firing, visually check and make sure the firearm is cleared of any cartridge(s) that were involved in the malfunction incident.
- 6 If there are ANY questions or problems regarding a malfunction, be sure to contact us at Volquartsen Firearms.

SCORPION

BARREL CLEANING

The barrel should be cleaned only from breech to muzzle using a pull-through cleaning system. Lock the bolt open using the bolt hold open feature. Any use of a cleaning rod from the muzzle end will void the warranty and greatly affect accuracy. Volquartsen Firearms recommends that the barrel be thoroughly cleaned approximately every 500 - 600 rounds. It may be necessary to clean the chamber on a more frequent basis using only a cotton swab.

AMMUNITION

Always wear protective shooting glasses and hearing protection when firing your Volquartsen Scorpion Pistol.

Your Volquartsen Scorpion Pistol is designed to use 22 Long Rifle (22 LR) type ammunition. The use of incorrect ammunition or incorrect cartridge component can result in damage to the firearm, serious injury, or even death to the user. Use of incorrect ammunition can cause bore obstruction and will void the warranty.

CCI® Stinger ammo is not recommended for use in this Volquartsen Scorpion Pistol due to the oversized cartridge.

GREAT ACCESSORIES

FOR YOUR

SCORPION

VOLQUARTSEN.COM

HOLSTER FOR SCORPION PISTOL

The search is over! This holster by LAG Tactical is the perfect match for your Scorpion Pistol. Whether it's competition day, range day, or just walking around; this holster will keep your pistol safe and secure.

BREAKTHROUGH® BATTLE ROPE™

The perfect on-the-go cleaning option for those needing a quick and efficient cleaning on the range. The integrated bronze brush scrubs away stubborn carbon, while the extra-thick rope wipes up residue.

BREAKTHROUGH® ALL-IN-ONE CLP

This biosynthetic CLP is expertly crafted using the finest base oils, additives, and most effective solvents that modern chemistry has to offer. Providing superior 2-in-1 cleaning and lubrication; it removes carbon fouling, oil, and grime. While penetrating deep to provide protection from rust and corrosion, all while minimizing friction and wear from metal-to-metal contact.

CLEANING MAT

The soft polyester top will ensure your gun doesn't get scratched while the neoprene rubber backing on the mat will keep everything in place and prevent your work surface from sliding around.
